SESAME Sliding Video

Y

Good 3D U's - Wolfgang Staerzinger

(Basic) SESAME Sliding technique

Find contact behind area of moving object

1. Render background (z- & item-buffer)
2. Render back-faces of moving object
3. Identify min z-distance & find polygons
4. Use geometry to position object
5. Do collision detection (graphics hardware)
6. If collision, go to 2.
